## THE LIFELINE TO BETTER HEALTH

We are constantly developing innovative In-Vitro Diagnostic solutions to accurately uncover the truth hidden in a single drop of blood. Our actions help to understand the known and discover the unknown, leading to the earliest detection, treatment and monitoring of the health of patients all over the world. Our cutting-edge In-Vitro Diagnostic solutions provide the lifeline that connects doctors and clinicians to their patients to deliver a positive health outcome.

## **we manufacture**

Our philosophy is to manufacture the highest quality products, that give reliable results and the insight into the patient's health.

## **we develop quality**

The highest quality of our reagents and analyzers is confirmed everyday by numerous laboratory practitioners all over the world.

## **we support**

We also support our clients with intensive product training and after-sales service, provided by qualified specialists.

# ANALYZERS

Automatic chemistry analyzers ACCENTs are intended to measure activity, concentration of multiple clinical chemistry analytes in serum, plasma, urine and cerebrospinal fluid samples.

## Accent M320 <sup>1)</sup>

Up to 360 T/H\* & up to 540 T/H\* with ISE

\* theoretical value

- Concave grating light-splitting technology with 12 wavelengths.
- Probe with featuring level detection, horizontal and vertical obstruct detection, probe clog detection and level tracking.
- Minimum reaction volume 100 µl.
- Waterfall probe washing - interior and exterior, sample carry-over ≤ 0.05%.
- 4-step to 8-stage washing station.
- Up to 150 positions for samples and reagents in 24-hour refrigerated compartment (2~12°C).
- 80 reusable reaction cuvettes.
- Water consumption ≤ 6.5 L/H.

## Accent MC240 <sup>1)</sup>

Constant 240 T/H & up to 400 T/H with ISE

# MARKET LEADING CLINICAL CHEMISTRY REAGENTS

When a diagnosis is accurate and made in a timely manner, a patient has the best opportunity for a positive health outcome because clinical decision making will be tailored to a correct understanding of the patient's health problem.

You can be CONFIDENT IN YOUR CLINICAL DECISIONS thanks to powerful capabilities of our reagent.

## COMPREHENSIVNESS

We have extensive portfolio of market leading reagents including enzymes, substrates, specific proteins and electrolytes to satisfy clinical needs. A wide range of sizes and methods both for own Accent analyzers and dedicated lines for third party ones offering high reliability and accuracy.

- routine screening
- allergic
- anemia
- bone metabolism
- cardiac
- covid-19

## QUALITY

Our quality management starts with stringent evaluation of specialized chemicals producers, raw materials testing with state of the art technology, through finished product prepared with our exclusive tried and proven formulation. With our own Medical Diagnostic Laboratory we take part in the largest reputable external quality control assessment programs like: RIQAS, EQAS, LABQUALITY or CAP. They confirm constant quality and stable results of our reagents.

## PERFORMANCE

Outstanding range of sensitivity and linearity of our reagents avoids the dilution process of high concentration samples. Consistent lot-to-lot reproducibility, excellent run-to-run precision and strong anti-interference ensure diagnostic test results you can trust. Also our R&D validation data confirm the excellent correlation to the commercially available kits, supplied by top IVD producers.

## COST SAVINGS

All reagents are available as ready to use stable liquids, which saves time and labor. Also accommodating packaging, minimal dead volume and suitable R1/R2 volume ratio helps to eliminate reagent wastage and unnecessary expense. The longest on board and calibration stabilities up to 12 weeks and shelf life up to 48 months directly translates to cost savings and commercial advantage.

## Ready to use reagents for a broad number of clinical chemistry analyzers

As a well-known provider of clinical chemistry solutions, Cormay develops and manufactures high quality reagents for open and dedicated lines.

Our reagents fit the broad number analyzers and enhance each and every of them.

**References:**

- 1) Data on User Manual for particular analyzers
- 2) Bottles fit for BIOLIS 50i Superior
- 3) Bottles fit for analyzers like OLYMPUS AU400 and AU640
- 4) Bottles fit for Roche moeds like HITACHI 911/912
- 5) Data on MSDS

## More User & Environmental Friendly Reagents

During the years, Cormay has started changes in the reagent formulations to find alternative detergents which are more eco-friendly for environment.

From many reagents like: ALAT, ASAT, BILIRUBIN DIRECT, CALCIUM ARSENAZO, LIPASE, PHOSPHORUS, URIC ACID, UREA, we removed Octylphenol Ethoxylates (OPEs), such as Triton X, which have toxic effect on aquatic species and replaced them with environment friendly detergents.<sup>5)</sup>

In case of other reagents like Concentrated Detergent B - we removed phosphate - component which can cause nutrient pollution of water and overgrowth of algae - which can have serious impacts on the environment and human health.
