

For Research Use Only. Not for use in diagnostic procedures.

CD-Chex CD103 Plus®

CD-Chex CD103 Plus is a ready-to-use control for evaluating intracellular and surface antigens, including CD103, CD30, CD38, CD56, CD138 and cytoplasmic Lambda, with monoclonal antibody binding by flow cytometry. It is a unique, positive procedural control with two distinct abnormal leukocyte populations: CD45+ and CD45-. CD-Chex CD103 Plus is compatible with BD Biosciences and Beckman Coulter flow cytometry systems.

Features

- + Only commercially available control assayed for CD103, CD30, CD38, CD56, CD138 and cLambda
- + Compatible with BD Biosciences and Beckman Coulter flow cytometry systems
- + Ready-to-use control for evaluating intracellular and surface antigens
- + 30-day open-vial stability
- Unique control with two distinct abnormal leukocyte populations: CD45+ and CD45-
- + 90-day closed-vial stability

Benefits

- Helps clinical laboratories meet quality requirements for leukemia and lymphoma immunophenotyping
- + Access to STATS®, a free interlaboratory quality control program with peer group data comparison and online submission
- + Established assay ranges provide less room for error
- + Reduces the need for labs to hold and validate patient samples for use as a control
